RAMAC® AT2

The Smart Asset Tracker

The RAMAC™ AT2 is an advanced asset tracking device engineered to ensure the safety and security of your assets.

This compact unit operates within a voltage range of 12V to 24V, making it suitable for various applications. The RAMAC™ AT2 also has an internal battery backup, which is charged once connected to the main power supply.

Utilizing the SigFox Network, the RAMAC™ AT2 can function in remote areas without needing extensive power or GSM coverage.

RAMAC® Portal Integration

Our designs are focused on low power developments that create intelligent IoT solutions with seamless integration with the RAMAC™ Portal and third party software to provide you with a complete world class technological solution.

RAMAC® AT2 Features

- The internal battery backup ensures that the device will continue to function even if the power supply is disrupted.
- The enclosure of the device is rated IP65.
- The RAMAC™ AT2 detects potential jamming.
- With its advanced features and easy installation, the RAMAC™ AT2 is the perfect solution for asset tracking in industries such as logistics, mining, transportation and construction.
- The RAMAC AT2 is the smart choice to protect assets and improve operations.
- Small and compact device.
- Daily self diagnoses via the Heartbeat message.
- Firmware can be upgraded via the RAMAC™ App.
