RAMAC MD1

Motion Detect Sensor

The RAMAC™ MD1 Sensor specializes in monitoring movement.

Featuring a 3-axis accelerometer, it enters ultra-low-power mode but promptly activates upon detecting motion. This functionality allows users to monitor motion or tilt on stationary assets effectively.

Its robust design supports real-time monitoring and includes Bluetooth Low Energy (BLE) for wireless configuration, setup, and commissioning.

RAMAC Portal Integration

Our designs are focused on low power developments that create intelligent IoT solutions with seamless integration with the RAMAC™ Portal and third party software to provide you with a complete world class technological solution.

RAMAC MD1 Features

- Installation and maintenance through the RAMAC™ App.
- Enhance service delivery and improve repair efficiency.
- Minimize theft risks, and address any further risks more effectively.
- Decrease downtime.
- Optimize cost management and lower CAPEX and OPEX for infrastructure maintenance, and increase awareness of financial risks (12 month forecast).
- Boost revenue growth.
- Foster continuous improvement in customer experience and strengthen brand value.
- Motion alerts are sent to the RAMAC™ Portal.
- Low battery warnings.
- Small and compact device.
- Daily self diagnoses via the Heartbeat message.
