G-Matrix Systems
Integrated System Design

CONNECTIVITY
Bluetooth Low Energy
SigFox RCZ1 - Class 0 and RCZ4 Ready
High-Precision GPS/GLONASS

BATTERY
Equipped with LiPo 800mAH 3.7V
Online Battery Indicator
Heartbeat Sent Once a Day

SPECIFICATIONS
SigFox Certified Class 0 (RCZ1)
ICASA Approved
Dimensions (LxWxH): 75 x 50 x 17 mm
Operating Temperature: -10°C to +60°C

CLOUD COMPUTING SERVICES
RAMAC™ Platform is MS AZURE Hosted
3rd Party Integration Available
Client Customisation

CONFIGURABLE MODES
Movement Activation Tracking
Fall Detection
Tracking Interval
Button Mode Configuration
Heartbeat Interval Configuration
Panic Mode Interval Adjustment
Off-line Logging
BLE Detection Configuration
GPS Lock Interval

RAMAC P1

Smart Location Button

The RAMAC™ P1 integrates GPS/SigFox and BLE technologies to create an innovative Smart Location tracking solution that is capable of providing location details, even in the most rugged areas where cellular network coverage is often limited.

Configuring the RAMAC™ P1 to your unique requirement is made easy through the RAMAC™ App, providing you with unmatched intelligence and ease of mind.

Whether you are monitoring company vehicles, equipment, personnel or your loved ones on a road trip, the RAMAC™ P1 has your back.

RAMAC Portal Integration

Our designs are focused on low power developments that create intelligent IoT solutions with seamless integration with the RAMAC™ Portal and third party control room software to provide you with a complete world class technological solution.

RAMAC P1 Features

- The RAMAC P1 is resilient to jamming by utilizing the global SigFox communication network. The RC1 Certification and RC4 Readiness ensures uninterrupted communication.
- With real-time communication the range is extended utilizing SigFox compliant radio networks to allow for continuous communication in remote areas.
- The versatile and compact button design of the RAMAC P1 makes light-weight and convenient to carry.
- Cost effective and low maintenance. The button is USB-C rechargeable and the firmware can be upgraded via the RAMAC™ App.
- Multi-functional configuration, including Panic and Tracking Modes.
- Daily self diagnoses via the Heartbeat message.
- API and SDK are available for IOS and Android, with offline logging capabilities for additional points that could not be sent in LPWAN messages.
