RAMAC SB1

The Static Button

The RAMAC™ SB1 allows users to quickly and discreetly send a distress alert during emergencies.

With a compact design and user-friendly interface, the RAMAC™ SB1 is the ideal added layer of security in homes, businesses, offices and public spaces.

The standout feature of the RAMAC™ SB1 is the alert acknowledgment capability, with the Sigfox network ensuring alerts are transmitted even in remote areas where traditional networks may falter.

RAMAC Portal Integration

Our designs are focused on low power developments that create intelligent IoT solutions with seamless integration with the RAMAC™ Portal and third party software to provide you with a complete world class technological solution.

RAMAC SB1 Features

- The RAMAC™ SB1 has an estimated battery life of up to 5 years, however, depending on the frequency of use of the device, this may shorten.
- The enclosure of the device is rated IP54.
- The RAMAC™ SB1 acknowledges that the alert has been sent with a 1,2, or 3 blink of the LED.
- The RAMAC SB1 has two attachment options; wall mounted or placed on a countertop or desk.
- The RAMAC™ SB1 is the perfect addition to homes, retirement villages, offices and public areas to enhance safety, protect assets and improve response in emergencies.
- Small and compact device.
- Daily self diagnoses via the Heartbeat message.
- Firmware can be upgraded via the RAMAC™ App.
